

Amani Selmi

AI Engineer · Data Scientist · Full-Stack Developer

ameni.selmi.info@gmail.com · +216 55 484 364 · Laouina, Tunis, Tunisia · linkedin.com/in/ameni-selmi-21bba2191 · github.com/amaniselmiit-lab

SKILLS

Machine Learning & Deep Learning

Python, TensorFlow / Keras, scikit-learn, CNN, U-Net (CBAM, CoordConv), Entraînement & évaluation, K-Means

Generative AI & LLMs

Applications agentiques (LLM), Prompt engineering, Modèles de diffusion, Outils de dev assistés par IA

Data & Business Intelligence

Pandas, NumPy, SQL, Prétraitement des données, Power BI, Dashboards & KPI

Full-Stack & Integration

Angular, TypeScript, React, Spring Boot (Java), API REST, OAuth2

Web & CMS

WordPress, PHP, HTML5, CSS3, Bootstrap, JavaScript, Responsive design

Databases & Cloud

PostgreSQL, MySQL, SQL Server, MongoDB, Microsoft Azure

Tools & Methods

Git / GitHub, Docker, Jira, Agile, Documentation technique

LANGUAGES

Arabic	Native
French	Fluent
English	Fluent
Italian	B2
German	A2

PROFILE

Master's graduate in Business Analytics & Data Science, I design, train and evaluate deep learning models in Python (TensorFlow/Keras, scikit-learn) — from data preparation to model assessment. NVIDIA-certified in deep learning, generative AI and LLM-based agentic applications, with a full-stack background (Angular, Spring Boot) to build the APIs and web systems AI models plug into. I love turning research-grade models into production-ready applications.

EXPERIENCE

AI / Data Science Intern

Feb 2026 — Jun 2026

LIMTIC FINAL-YEAR PROJECT — MASTER'S

- Designed and trained an ensemble of 4 U-Net models (CBAM attention, CoordConv) for automated mammography positioning assessment.
- Built the full pipeline: medical image preprocessing, dataset preparation, model training and evaluation (Python, TensorFlow/Keras).
- Iterated on architecture and hyperparameters based on evaluation metrics.

IT Trainer

Oct 2025 — Jul 2026

EFC — Executive Training School

- Designed and delivered software development and data administration training with hands-on projects.
- Explained technical concepts to non-technical audiences and produced clear documentation.

IT & Robotics Trainer

Jan 2025 — Jun 2025

Taybah Education Group

- Taught programming fundamentals and robotics concepts through tailored materials for each level.

Full-Stack Developer Intern

Feb 2024 — May 2024

ONP FINAL-YEAR PROJECT — BACHELOR'S

- Built a web application for Active Directory administration (accounts, groups, organizational units) with Angular and Spring Boot.
- Developed REST APIs, designed the data model (MySQL) and secured access with OAuth2.
- Tracked tasks and tickets with Jira.

Full-Stack Developer Intern

Jul 2023 — Aug 2023

BTS Bank

- Developed an application to manage rejected transactions.
- Investigated anomalies and ran corrective SQL queries with data-integrity checks.

Front-End Developer Intern

Jul 2022 — Aug 2022

MPSoft Manager

- Developed a responsive intranet application (HTML, CSS, Bootstrap).

EDUCATION

Master's — Business Analytics & Data Science

2024 — 2026

Université Virtuelle de Tunis

Bachelor's — Information Systems Development

2021 — 2024

ISSET Zaghouan
