

AMANI SELMI

AI Engineer

ameni.selmi.info@gmail.com | +216 55 484 364 | Tunis, Tunisia | [linkedin.com/in/ameni-selmi-21bba2191](https://www.linkedin.com/in/ameni-selmi-21bba2191)

SUMMARY

Master's graduate in Business Analytics & Data Science with hands-on experience designing, training and evaluating deep learning models in Python (TensorFlow/Keras, scikit-learn), from data preparation to model assessment. NVIDIA-certified in deep learning, generative AI and LLM-based agentic applications, and experienced in building the APIs and web systems that AI models plug into. Eager to deliver production-grade AI applications on real client projects.

SKILLS

Machine Learning & Deep Learning: Python, TensorFlow/Keras, scikit-learn, CNN, U-Net (CBAM, CoordConv), model training and evaluation, clustering (K-Means)

Generative AI & LLMs: LLM-based agentic applications, prompt engineering, generative AI (diffusion models), AI-assisted development tools

Data Engineering: Data preparation, cleaning and validation, preprocessing pipelines, Pandas, NumPy, SQL

Software & Integration: REST APIs, Angular, TypeScript, Spring Boot (Java), OAuth2 authentication, Git/GitHub, Docker

Databases & Cloud: PostgreSQL, MySQL, SQL Server, MongoDB, Microsoft Azure (AI Fundamentals certified)

Reporting: Power BI, dashboards and KPI monitoring

Languages: English (fluent) · French (fluent) · Arabic (native) · Italian (B2) · German (A2)

PROFESSIONAL EXPERIENCE

AI / Data Science Intern — LIMTIC (Final-Year Project)

Feb. 2026 — Jun. 2026

- Designed and trained an ensemble of 4 U-Net models (CBAM attention, CoordConv) for automated mammography positioning assessment.
- Built the full pipeline: medical image preprocessing, dataset preparation, model training and performance evaluation (Python, TensorFlow/Keras).
- Iterated on model architecture and hyperparameters based on evaluation results.

IT Trainer — EFC (Executive Training School)

Oct. 2025 — Jul. 2026

- Designed and delivered software development and data administration training, with hands-on projects.
- Explained technical concepts to non-technical audiences and produced clear documentation.

IT & Robotics Trainer — Taybah Education Group

Jan. 2025 — Jun. 2025

- Taught programming fundamentals and robotics concepts through tailored materials.

Full-Stack Developer Intern — ONP

Feb. 2024 — May 2024

- Built a web application for Active Directory administration (user accounts, groups, organizational units).
- Developed REST APIs with Spring Boot, designed the data model and secured access with OAuth2 — the integration layer AI services connect through.

Full-Stack Developer Intern — BTS Bank

Jul. 2023 — Aug. 2023

- Developed an application to manage rejected transactions; investigated anomalies and ran corrective SQL queries with data integrity checks.

Front-End Developer Intern — MPSoft Manager

Jul. 2022 — Aug. 2022

- Developed a responsive intranet application using HTML, CSS and Bootstrap.

AI & DATA PROJECTS

- Brain Tumor Detection (Deep Learning) — CNN model trained on MRI scans for tumor detection.
- Unsupervised Image Classification (Data Mining) — K-Means clustering of unlabeled images by visual similarity.
- KPI Monitoring Dashboard (Power BI) — Interactive dashboard tracking key performance indicators.

EDUCATION

Master's Degree in Business Analytics & Data Science — Université Virtuelle de Tunis

2024 — 2026

Bachelor's Degree in Information Systems Development — ISET Zaghouan

2021 — 2024

CERTIFICATIONS

Building Agentic AI Applications with LLMs — NVIDIA (2026) ; Generative AI with Diffusion Models — NVIDIA (2026) ; Fundamentals of Deep Learning — NVIDIA (2026) ; Business Analysis Fundamentals with AI — BA-Learning (2025) ; Azure AI Fundamentals — Microsoft (2024) ; Machine Learning & AI — GDG (2023) ; Linux Fundamentals — Securinets (2023)
